

Simulating Virus and Host Coevolution Using Evolutionary Computation

Laura Colbran, Samuel Greaves, Liz Shank

1 Introduction

Biology? What is our project exactly? What were we expecting to find?

2 Methods

or Setup? How is our algorithm structured? Representation? What did we change from our inspiration?

3 Results

What are some things we've observed?

4 Discussion

What was hard? How close did we come to what other paper saw? What was new? What are some new directions to try?
